EDUCATION

- Dr.B.R.Ambedkar National Institute of Technology** Jalandhar, India
Bachelor of Technology - Electronics and Communication Engineering; Nov 2022 - June 2026
Courses: Data Structures and Algorithms, DBMS, SQL, Object Oriented Programming (OOPS)

SKILLS SUMMARY

- Programming Languages:** C, C++, Java, Python
- Frontend:** React.js, Next.js, HTML5, CSS3, Tailwind CSS
- Backend:** Node.js, Express.js, Flask, REST APIs, JWT Authentication
- Databases:** MongoDB, MySQL
- Tools:** Git, GitHub, Postman
- Cloud & Deployment:** AWS, Vercel, Render

EXPERIENCE

- Basil Infotech** Remote
Software Development Executive Intern June 2025 – August 2025
 - FoodIO – Recipe Sharing Platform (Live):** Engineered scalable full-stack application using React, Node.js, Express, and MongoDB for dynamic recipe management and efficient data handling.
 - Authentication & APIs:** Designed secure JWT-based authentication and developed RESTful APIs supporting scalable CRUD operations with proper error handling and middleware validation.
 - Feature Development:** Implemented dynamic search, favorites management, pagination, and optimized UI using Tailwind CSS for improved responsiveness.
 - Database Optimization:** Structured MongoDB collections, implemented indexing, and optimized queries to improve backend performance and reduce response time.
 - Deployment & Integration:** Deployed the application on Render, ensured production-ready configuration, and integrated third-party services for enhanced functionality.
- NIT J Hostel Allotment Website** NIT Jalandhar
Software Developer 2024 – Present
 - Hostel Allotment Platform (Live):** Developed database-driven hostel allotment system serving 5,000+ students and 200+ staff with structured backend workflows.
 - Workflow Automation:** Digitized allotment process, reducing processing time by 85 percent through optimized allocation algorithms.
 - Admin Dashboard Development:** Built role-based dashboard to manage 2,500+ hostel rooms with optimized queries and secure access control.
 - Database Management:** Designed schema models, implemented validation logic, and improved database efficiency using structured query optimization techniques.
 - System Reliability:** Improved system stability through error handling, data validation, and performance tuning for smooth large-scale operations.

PROJECTS

- MatchLoop AI – Resume Screening System (Flask, React, SQLite, REST APIs, LLM):** Developed an AI-powered web application to analyze resume compatibility with job descriptions using semantic scoring and skill-gap analysis. Designed modular backend architecture with secure resume parsing and scalable REST API integration. Implemented LLM-based semantic matching, dynamic scoring algorithms, and structured database storage for candidate insights.
- MERN E-Commerce WebnApp (Live) [GitHub]:** Built a production-ready full-stack e-commerce platform with JWT authentication, Razorpay payment integration, and automated email confirmation. Designed secure order workflow, implemented role-based access control, and optimized backend database queries for performance and scalability. Developed responsive UI components and efficient state management for seamless user experience.
- Real-Time Interview Behavioral Analysis System (Python, OpenCV, DeepFace, TensorFlow):** Developed a real-time AI prototype that detects facial emotions and estimates confidence and stress levels using deep learning models. Integrated OpenCV for live video capture and DeepFace for emotion recognition. Designed weighted scoring logic, automated session reporting, and data visualization for behavioral performance insights.
- WikiSense – Wikipedia Search Application (React, Vite, REST API, CSS):** Created a fast and responsive Wikipedia search application with real-time API integration and optimized client-side rendering. Implemented reusable component architecture, debounced search functionality, and efficient API handling for enhanced performance. Improved UI responsiveness and minimized API calls for better user experience.

POSITIONS OF RESPONSIBILITY

- Internshala Student Partner (ISP) – Campus Ambassador, NIT Jalandhar:** Led campus outreach initiatives and increased student participation in internships and skill-development programs through structured promotion and engagement activities.
- IOTA – Core Member:** Organized technical events, coordinated logistics, and supported peers in system optimization and tool adoption.
